FAQ System on the VMS
UC Master Gardener Program

What is the VMS?

The Volunteer Management System (VMS) is an online system designed and built by the University of California Agriculture and Natural Resources (ANR) Web Action Team.

VMS is used by California master gardener volunteers and coordinators to manage time (hours), projects, newsletters, documents, and photo albums. Components of VMS are also used to facilitate discussion among volunteers, coordinators, and the statewide office.

The system is:

- user-friendly for volunteers
- modifiable by each county's Master Gardener Program administrator, to provide a unique site
- vigorous enough to retain record tracking functions required by UC and the Statewide Master Gardener Program.

Privacy Policy

The personal information you provide on the roster/profile page of the volunteer management system (VMS) will not be made available in any public way. The policy of University of California is to protect individual privacy rights. However, it is necessary to maintain a roster including individual names, telephone numbers, email address and other personal contact data to effectively carry out Master Gardener business. This information will be shared with other Master Gardener volunteers in your county and is available to the Statewide Master Gardener Program for official purposes only. This information will not be made public but if you want to keep this information hidden, please check the "Private" box. These data are not considered public records and they will not be released in any public setting without your express written authorization.

Holiday Season Brings Poisonous Plants into the Home
 Posted: December 10, 2015 by mgjnomads@ucanr.edu (Melissa G. Wornack)

During the holiday season many plants, cut flowers and flowering bulbs are used as decoration and given as gifts. Many of these items can be poisonous to both humans and pets with long-term negative effects to ones health. Plant poisoning can range from simple rashes and blisters all the way to organ damage and in severe cases death. Be safe this holiday season by being mindful of what plants and flowers you are either giving, receiving or decorating with. Common holiday plants that pose a...
